## Preface

Design of complex artifacts and systems requires the cooperation of multidisciplinary design teams. The Seventh International Conference on Computer Supported Cooperative Work in Design (CSCWD 2002) provides a forum for researchers and practitioners involved in different but related domains to confront research results and discuss key challenges. The major topics of CSCWD 2002 include the following:

- Techniques, methods, and tools for CSCW in design;
- Social organization of the CSC process;
- Integration of methods and tools within the work organization;
- Cooperation in virtual enterprises and e-businesses
- CSCW in Design and Manufacturing
- Interaction between the CSC approach and knowledge reuse as found in knowledge management;
- Intelligent agent and multi-agent systems;
- Internet/Web and CSCW in design;
- Applications and testbeds.

The current proceedings contain 85 papers presented at CSCWD 2002. The papers are grouped according to their contents to facilitate parallel session organization and discussions.

We would like to thank all members of the Program Committee who helped in the conference promotion and paper review process, and the authors who contributed to this conference.

We would also like to thank all organizing committee chairs and members for their great efforts to make this conference successful.

Special thanks to Jonice Oliveira, Leonardo Cardoso, Gustavo Pinto, Patricia Leal and Yangsheng Li, who provided a lot of help during the preparation of the conference and the editing of the conference proceedings and also thanks to IEEE Rio de Janeiro Section, FAPERJ, Fundação COPPETEC for their sponsorship.
