Preface

Design of complex artifacts and systems requires the cooperation of multidisciplinary design teams. The Eighth International Conference on Computer Supported Cooperative Work in Design (CSCWD 2004) provides a forum for researchers and practitioners involved in different but related domains to confront research results and discuss key problems. The major topics of CSCWD 2004 include the following:

- Techniques, methods, and tools for CSCW in design
- Social organization of the CSC process
- Knowledge management for cooperative design
- Intelligent agents for cooperative design
- Workflows for cooperative design
- Database technologies for cooperative design
- VR technologies for cooperative design
- Internet/Web, Web Services, Grids, and CSCW in design
- Collaborative Design and Manufacturing
- Cooperation in virtual enterprises and e-businesses
- Distance learning / training related to design
- Applications and testbeds.

Due the outbreak of SARS early in 2003, the conference organizing committee, in consultation with the Steering Committee, decided to postpone the conference from October 22-24, 2003 to May 26-28, 2004. To meet the authors' requests on the publication date, the program committee decided to publish the conference proceedings in two volumes: Volume I in November 2003 and Volume II (this volume) in May 2004. This volume contains 148 papers from over 13 countries.

We would like to thank all Program Committee members for their efforts in promoting the conference and carefully reviewing the submitted papers, as well as the authors who contributed to the conference.

We would also like to thank the chairs and members of the organizing committee for taking care of all the details to make this conference successful. We acknowledge the sponsorship of Xiamen University, China and the co-sponsorship of IEEE Beijing Section, CIMS Committee of National Hi-Tech R&D Program of China, China Computer Federation, National Natural Science Foundation of China, Zhongshan University, China, Fuzhou University, China, and Xiamen Computer Federation, China.

Special thanks to Dandan Liu, Zhongpan Qiu who made significant contributions to the preparation of the conference and the editing of the conference proceedings. Thanks to Yuguang Fu for designing the cover of the proceedings.
