#### Scope of Conference

Design of complex artifacts and systems requires the cooperation of multidisciplinary design teams. The Eleventh International Conference on Computer Supported Cooperative Work in Design (CSCWD 2008) provides a forum for researchers and practitioners involved in different but related domains to confront research results and discuss

key problems. The major topics include, but not limited to:

- Techniques, methods, and tools for CSCW in design
- Knowledge intensive cooperative design
- User modeling for cooperative design
- Agents and multi-agent systems for cooperative design
- Workflows for cooperative design
- VR technologies for cooperative design
- Grids, Web services, semantic Web for cooperative design
- Mobile collaboration and applications
- Collaborative networks and applications
- Collaboration in manufacturing, services, and businesses
- Distance learning/training related to design
- Practice and experience with collaborative systems
- Other areas related to CSCW in design

#### Submission of Papers

Papers reporting original research results and experience are solicited. Each paper, written in English, should be no more than 6 pages (IEEE proceedings format), including references and Illustrations. E-submissions in PDF format are strongly recommended. Submission of a paper should be regarded as an undertaking that, should the paper be accepted, at least one of the authors will attend the conference to present the paper.

#### Submission Web site:
